

VOIS | MGOV

So much more than just an information app

VOIS | MGOV enables the Municipality to effectively connect, communicate and serve citizens from all socio-economic layers by providing mobile application services to all types of mobile phones (intelligent and non-intelligent) and all digital devices.

The use of direct communication channels, especially via mobile devices, offers four advantages:

- The technology can improve the management of the Municipality
- It promotes a better understanding of the citizens and the Municipality
- It reduces the cost of public participation
- It improves service delivery

The advantages of VOIS | MGOV for the citizens are that they have a direct communication channel with the municipal administration. They are able to interact with the Municipality and have access anytime, anywhere – with reduced effort, effort and expense.

Flexible and scalable

VOIS | MGOV is flexible and therefore individually configurable by each community to provide an optimal offer. VOIS | MGOV can be used at all administrative levels. The system is completely scalable.
