MUNICIPAL EXPERIENCE IN EXCESS OF 25 YEARS

**FOR MORE THAN TWO DECADES
WE HAVE BEEN OFFERING OUR
CUSTOMERS SOFTWARE DEVELOP-
MENT AND SUPPORT FROM A SIN-
GLE SOURCE.**

HSH GLOBAL SOFTWARE is part of the HSH group of companies which currently consists of 10 companies with branches in 5 countries.

More than 3,500 municipalities, towns and districts, federal states and several federal ministries in Germany now benefit from our software solutions. As the leading provider in the field, we are your preferred partner for the design of processes and interfaces.

OUR PRODUCTS ARE CHARACTERIZED BY
QUALITY AND INNOVATION.

WITH OUR CUSTOMERS WE SET THE STANDARDS

With our in-house developed processes, we set standards in terms of user-friendliness, modularity and investment security. Our products reliably support our users in the technically demanding processing of processes.

WE CREATE SOLUTIONS

Our customers trust in the quality of our products and the competence of our employees. We provide a comprehensive package of specialist modules on the VOIS | platform we developed. Thanks to the modular structure and the uniform technical basis, we cover almost all areas of modern administrations, at any

TRAINING/ EDUCATION

Thorough training is the best prerequisite for successful completion of tasks. Therefore, please check your training requirements regularly. Our staff will be happy to advise you in order to create optimal conditions for the user of the software in your administration. We regularly offer in-depth updates and advanced seminars. Webinars on updates and current important topics are also delivered constantly.

The close and lasting cooperation with users in administrations of different sizes gives us the basis for the development of our software. In this way we meet the professional and technical requirements of the solution. With our experience and competence, we are a reliable partner for our customers, while we are working today on the solutions for tomorrow. In this way, together we can optimally cover the requirements for all daily tasks.

level. A consistent look and feel, the highest degree of interoperability and an administration-friendly structure, simplify and accelerate all administration processes considerably.

Our many years of experience are supplemented by cooperation in partnership with other companies, institutions and authorities. Always with the aim of finding the best possible solution.

SUPPORT

Within the scope of software maintenance (SLA), we provide comprehensive support by telephone, email and remote maintenance for the use of our software in day-to-day business. Additionally, we provide the complete execution of all updates of our products for customers in the context of our update services, if desired.
